PROJECTS

Dice Game – Java Swing Application | [Link](#) Jul 2025

- Built an interactive Dice Game application in Java Swing, featuring engaging dice animations, synchronized sound effects, and intuitive user interface controls for enhanced player experience.
- Executed multiplayer gameplay logic with dynamic round progression, real-time score tracking, customizable game rules, and an automatic leaderboard for ranking all active participants.
- Utilized robust object-oriented principles and event-driven programming concepts to ensure a modular, maintainable, and highly user-friendly application structure suitable for future enhancements.

Tech: Java, Java Swing

SpeakPeak - AI Mock Interview Platform | [Link](#) Jun 2025 - Jul 2025

- Designed and deployed real-time AI mock interviews by seamlessly integrating Vapi for voice AI and Google Gemini API for dynamic question generation.
- Improved a responsive and interactive user frontend using React and TypeScript, featuring intuitive real-time session controls and performance analytics.
- Architected secure Firebase authentication and cloud data storage to maintain persistent user profiles and comprehensive interview history.

Tech: React, Vapi, Firebase

EcoThread Advisor – Dockerized Chatbot | [Link](#) Apr 2025-May 2025

- Established an interactive Streamlit web app with real-time AI chat interface, secure user authentication using bcrypt encryption, and persistent session state management.
- Structured responsive UI dashboard with Streamlit components for seamless chat interface, dynamic data tables, and CSV export functionality.
- Integrated OpenRouter API for AI responses and implemented SQLite database for user management

Tech: Streamlit, Docker, SQLite, OpenRouter API, bCrypt
